

ENGINEER'S STATEMENT

I, C. Michael Adkins, hereby declare the following in support of this application being filed by SSR Communications, Inc., licensee of station WYAB, for a license to cover construction permit BPH-20050131AIX:

1. That I did oversee the assembly and installation of a directional antenna compliant with the conditions of the construction permit, a Shively Labs model 6810-4-DA, S/O 24258, on December 11, 2005 and that the assembly and installation were performed pursuant to the manufacturer's instructions.
2. That the center-of-radiation of the installed antenna was 115 meters above ground level as specified in the construction permit.
3. That the antenna azimuth was oriented as specified by the manufacturer and as certified elsewhere in this application by a licensed surveyor.

I am a qualified, practicing engineer. I hold both a Bachelor's of Electrical Engineering degree and a Master's of Electrical and Computer Engineering degree from the Georgia Institute of Technology, Atlanta. I have worked in FM broadcast engineering for eight years and have a number of works on record with the Commission. I have been the chief engineer of WYAB radio for two and a half years.

C. Michael Adkins
