**KUAP RADIO STATION**  
**CH 209C2 - 89.7 MHZ - 50.0 KW**  
**PINE BLUFF, ARKANSAS**  
**November 2006**

**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of Board of Trustees of the University of Arkansas ("UA"), licensee of KUAP, Channel 209A, Pine Bluff, Arkansas. UA herein proposes to make minor changes in the facilities of KUAP by changing the height above average terrain, increasing power and changing channels (from 209A to 209C2). No other changes are proposed.

UA is proposing to locate the upgraded KUAP on an existing tower. As such, the Federal Aviation Administration has not been apprised of this proposal. The tower on which the antenna is to be located has been registered with the Commission and assigned Antenna Structure Registration Number 1047449. All exhibits called for on FCC Form 340, Section VII, are attached hereto, including an analysis of the proposed facilities in comparison to all other potentially impacted non-commercial stations on co- and adjacent channels (see Exhibit A). Further, the proposed facility is within the reference distance to VHF television stations WABG-TV, Channel 6, Greenwood, Mississippi and KEMV, Channel 6, Mountain View, Arkansas. See Exhibit B for §73.525 compliance.

Based on the increased power for KUAP being implemented on a short tower, the worksheets attached to FCC Form 340 could not be used to certify compliance with the Commission radio frequency radiation rules. Therefore, attached as Exhibit C is a study demonstrating this proposal is in compliance with the Commission's RF radiation rules. All other exhibits used to certify the information contained in the application have been forwarded to UA and are available for submission to the Commission upon request.
