COMPREHENSIVE TECHNICAL EXHIBIT

Application for Flash Cut of Construction Permit
K20IM, FCC ID 125290, Barstow, CA
FCC File Number BPTTL-20081009ANQ
EICB-TV West, LLC

Application for Flash Cut to Digital Operation. The within filing seeks a change only to digital operation at the present location of the above-captioned construction permit. Its antenna pattern and ERP are changed, but the 51 dBu F50,90 service contour enjoys almost total overlap with the 74 dBu F50,50 protected contour that of the underlying CP. The proposal provides service to the same community of license.

Use of Unregistered Tower. The application is on a 37 meter tower shared with FM station KXXZ. The proposal was subjected to *Towair* analysis and found not to require registration with the FCC, thanks to being more than 8 km distant from any airport.

Interference Analysis. The official FCC OET 69 study as run on Sun computer was performed; the within application complies with all applicable portions of §74.793 and continues to comply with § 74.709 with respect to the cochannel land mobile station in Los Angeles.
