

Athomic Broadcasting, Inc. ("AB") is the licensee of KKHI Laramie, Wyoming. Victor A. Michael, Jr. is the sole stockholder and owner of AB.

Figure 1 shows the 70 dBu contours for FM stations and 5 mv/m contours for AM stations of all of the above listed stations under common ownership by MSR, LMB and AB. Only KRQU(FM), and KRRR(FM) overlap with the two stations proposed to be acquired (KRAE-AM & KZCY-FM) by MSR. KIMX(FM), KRQU(FM), KKHI(FM), KASX(FM) and KLDI(AM), either presently licensed or proposed (all applications and/or Construction Permits are shown for all stations), do not overlap with KRAE(AM) or KZCY(FM). Thus, only the composite contours of these four stations (KRRR, KRQU, KZCY, KRAE) will be considered in this study.

Figure 2 and Figure 3 are contour maps showing other FM stations that city grade contours (70 dBu) overlap with the either KRQU, KRRR or KZCY. At this point, 15 FM stations were found to overlap. Figure 4 shows a tabulation of the stations considered.

Since at least 17 stations (including KRAE-AM and KLDI-AM) were found to overlap, no further study was conducted, since according to 73.3555(a), markets containing at least 15 stations, proposed common ownership of up 7 stations is allowed, with no more than 4 stations in the same band. Since MSR is proposing common ownership of 3 FM's and one FM (KRQU, KRRR, KZCY, KRAE-AM). MSR meets the requirements of 73.3555(a) for multiple ownership. As also noted, KRQU and KRRR are awaiting FCC approval to be assigned to AGM Fort Collins, LLC. Once these
