# American Family Radio

February 7, 2007

We have upgraded our station K210BU, licensed in Nov. 1996, to KDLI, permit file #BPED-19960715MD, on tower #1026343. The construction permit called for special consideration to be made to KTJK(AM), facility #22119, in the construction of the tower or any changes made to the tower. We made no changes to the tower of any kind. The existing structure and antenna were used for the upgrade. The tower was installed in 6/1987 and the antenna was installed 10/1996. Due to the fact that there were no changes made to the structure the AM station did not have to change any of its present or prior reading methods.

Sincerely,

Joey Moody  
Director of Engineering
