

EXHIBIT 11

This narrative exhibit is submitted to demonstrate that the instant proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules. Attached at exhibit 12 are a spacing study, an additional narrative exhibit which includes a Section 74.1204(d) showing, and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but five other FM facilities (current or proposed facilities). The attached maps and Section 74.1204(d) study with regard to overlap between this proposal and the coverage contours of WDMT, Pittston, PA and Proposed WAMT, Avoca, PA demonstrate that there is no prohibited contour overlap between these five facilities and the instant proposed FM translator facilities. Two proposed new FM translators and one operating FM translator have also been included on the maps because of their proximity to the proposed facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The eight facilities that have been included on the attached maps are: WKSJ, 102.7, Williamsport, PA (54 dBu contour to proposed 34 dBu interference contour); WNEW, 102.7, New York City, NY (54 dBu contour to prop. 34 dBu int. contour); WDMT, 102.3, Pittston, PA (60 dBu contour to prop. 100 dBu int. contour); Proposed WAMT, 103.1, Avoca, PA (60 dBu contour to prop. 100 dBu int. contour); Vacant, 102.9, Narrowsburg, NY (60 dBu contour to prop. 54 dBu int. contour); Proposed Translator, 102.9, Carbondale, PA (60 dBu contour to prop. 54 dBu int. contour); Proposed Translator, 102.9, Chenango Bridge, NY (60 dBu contour to prop. 54 dBu int. contour); and W273AB, 102.5, Owego, NY (60 dBu contour to prop. 54 dBu int. contour). WEZX 102.7 Clarks Summit, PA Interference

Analysis, Blown Up Scale is a map included to more clearly demonstrate that no proposed overlap exists between this proposal's 54 dBu and 100 dBu interference contours and the 60 dBu coverage contours of Proposed Translator, Carbondale, PA; WDMT, Pittston, PA; and Proposed WAMT, Avoca, PA. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
