Pursuant to the requirements set forth in the Commission's August 22, 2002 Public Notice (DA-2049), the parties hereby provide the specific reasons for each omission and the basis for the determination that the omitted documentation is not material to the Commission's consideration of the subject application. At the outset, however, the parties note that core terms of the agreement of the parties with regard to the sale of the stations are contained in the Asset Purchase Agreement. The ancillary Schedules that have been omitted do not alter the core agreements of the parties contained in the Agreement. As such, these omitted documents are not material to the Commission's processing of the Application.

Schedules 1.1(b), 1.1(c), 1.1(d), and 1.1(e) merely provide further description or itemization of assets to be conveyed or excluded from the Asset Purchase Agreement. The categories of assets to be conveyed are fully described in the Agreement. The schedules simply list or further describe, on an item-by-item basis, various properties that are subject to the general terms contained in the Asset Purchase Agreement and contain proprietary, non-public information.

Schedule 1.2 merely provides a specific listing of certain assets not included in the sale.

Schedule 2.7 identifies certain encumbrances on real property to be assigned to Buyer. These are identified generally by reference to title reports not included in the Agreement or Schedules.

Schedule 2.9 sets forth information with respect to environmental matters relating to the real property. These are identified generally by reference to environmental reports not included in the Agreement or Schedules.

Schedule 8.1(xiii) is a form of legal opinion to be delivered by the Seller, is proprietary, and is not material to the Commission's processing of this application.

These omitted Schedules will be made available to the Commission upon its request.
