Certification of Non-interference

Customer: Adams Radio Group.

Location: Fort Wayne, IN

Date: 4/4/2017

The proposed antenna for WXKE at 151m AGL will not adversely affect the performance of the WWFW antenna designed and manufactured by SWR, LP. Based on our analysis sufficient space exists between WXKE (151m) and WWFW (137m). No other antennas may be installed below 142m or above 132m on any tower face or leg. These would adversely affect the performance of the WWFW directional antenna.

Thank you,

Kevin W. Rager  
SWR, LP Engineering
