An evaluation according to OET-69 is presented to support this proposed facility change. In evaluating the proposed facility change for K53AB CP with FCC file #BPTT20041201CAO, an outgoing interference study was executed using the OET-69 Longley Rice Methodology using a signal resolution of 1 km and a spacing increment of 0.1 km with an ERP of 0.50 kW. The CDBS database of 10/08/2005 was used for this analysis. The following stations were considered in the study:
