RE: WJHO Shivley Antenna Orientation Certification

Sir,

In response to the request for certification of the orientation of the WJHO Shivley Labs designed FM Station Directional Antenna Model 6513-2 (as shown on a drawing provided to me dated 03/29/2012) attached to the tower located North of Alabama State Highway #148 1.4 miles West (+/-) from the intersection of Highway #148 with Alabama State Highway #9 with a Lat. - Long. Of: 33 12 30.31426 N, 85 59 31.22036 W.

I returned to the site on 29 May 2012. Using the previously verified orientation of the faces of the tower and a hand held "jig" (used by the installer to perform final orientation of said antenna) and do verify that the said antenna was installed to the diagrammed direction of 45 degrees True North.

State of Alabama
Clay County

I, Patrick S. Ratley, a registered Land Surveyor in the State of Alabama hereby certify that on 29 May, 2012 the aforementioned antenna was installed and oriented to the correct vector on the assembled antenna mast.

Patrick S. Ratley
Patrick S. Ratley, Ala. Reg. No. 31839-S
Patrick Ratley Land Surveyor

If you need any other information please feel free to call or email my office. I appreciate the opportunity to work with you on this project.

Sincerely,

Patrick S. Ratley
