**K LICENSEE, INC.**  
**W17CD LPTV TELEVISION STATION**  
**CH 17- - 75.0 KW**  
**STAMFORD, CONNECTICUT**  
**February 2007**

**TECHNICAL STATEMENT**

This Technical Statement was prepared on behalf of K Licensee, Inc. ("KI"), licensee of W17CD, Stamford, Connecticut. KI holds a permit to relocate W17CD to a new site (BPTTL-20061013AAI). This instant application seeks a license to cover the outstanding permit. Attached, as Exhibit A, is a calculation of the transmitter output power for the W17CD transmitter.

There were two special operating conditions/restrictions listed on the W17CD permit. The first relates to the use of a transmitter with a visual carrier tolerance of plus or minus 1.0 kHz. The W17CD transmitter has the required tolerance. The second condition notes that W17CD is a secondary service and must not cause interference to the reception of existing, or future, full service television stations and must accept interference from these facilities. KI acknowledges this requirement.

KI also notes it will, in cooperation with other tower users, reduce the power of W17CD or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio frequency electromagnetic fields in excess of the FCC's guidelines. Based on the foregoing, it is believed that all conditions on the W17CD permit have been satisfied.
