Affidavit Certification and
Qualifications of Supervising Engineer

In Support of FCC Form 302-FM

WTMK Lowell, IN
Permit BPED-19980417ME
Facility ID # 90498

On this date December 11, 2005, the proposed facility has been constructed as permitted in the construction permit BPED-19980417ME. I have supervised all aspects of the WTMK transmission site, Installation of the transmitter and directional Antenna assembly installation.

I certify that the directional antenna is constructed and installed to the exact specifications of the antenna manufacture. The installed antenna is a new Shively Labs 6810-2D-DA, which was factory tuned and tested on a similar tower structure for directional characteristics on 88.5 Mhz as specified in the Construction Permit. The tower is an existing tower, which was considered in the manufacture, tuning and testing of this antenna by Shively Labs. The tower structure and orientation are specified in the configuration used by Shively Labs, in tuning and testing on the installed antenna. This antenna was installed to Shively Labs' specifications shipped with the antenna by me. Further, a professional surveyor Licensed by the State of Indiana confirmed the orientation of the antenna mounting.

I certify, that the preceding is true and correct to the best of my knowledge and abilities as a broadcast engineer with CSN International. I am familiar with the FCC regulations regarding this construction permit.

James Motshagen
CSN International
