

**MINOR CHANGE APPLICATION**  
**GULF COAST COMMUNITY COLLEGE**  
**WKGC-FM RADIO STATION**  
**CH 214C1 - 90.7 MHz - 100.0 kW - ND**  
**PANAMA CITY, FLORIDA**  
**February 2006**

This Technical Statement and attached exhibits were prepared on behalf of Gulf Coast Community College ("GCCC"), licensee of WKGC-FM, Channel 214C1, Panama City, Florida. GCCC herein proposes to make minor changes in the facilities of WKGC-FM by relocating the transmitter site and increasing the height above average terrain. It is proposed to maintain the present operating power and station class.

GCCC is proposing to relocate to a new tower structure, therefore, the FAA has been notified of the proposed construction by FAA Form 7460. Upon receipt of the expected Determination of No Hazard to Air Navigation, the structure will be registered with the Commission and an amendment to this application will be filed to provide the Antenna Structure Registration Number ("ASRN"). It is proposed to co-locate WKGC-FM with the applied for facility for WKGC (AM). An application amending the pending application by WKGC (AM) to relocate to this same site, specifying the herein proposed tower (radiator) is being timely filed by GCCC.

Due to the co-location of WKGC-FM with a proposed AM broadcast facility, use of the worksheets associated with FCC Form 340 to verify compliance with the Commission's radio frequency radiation rules was not possible. Therefore, attached as Exhibit C is a study

demonstrating compliance with the RFR rules. There is one Channel 6 television station within 187 kilometers, WCTV, Thomasville, Georgia. See Exhibit B for details regarding compliance with §73.525. All other exhibits used to certify the information contained in the application have been forwarded to GCCC and are available for submission to the Commission upon request.
