"mc" indicates supplemental Measured Conductivity Information as noted in Exhibit(s) 15.4 - 15.5

* Please note the Waiver request of received contour overlap as noted in Exhibit 15.3. Inspection of the Exhibit 15.3 map will show the proposed contour overlap falls over water or the uninhabited South Manitou Island for which a similar waiver was granted in the WNAM.C Construction Permit application as well as the recently licensed WMKT operation.

Negative values in the "In" and "Out" columns reflect km² areas of Incoming and Outgoing overlap respectively. Positive values reflect linear distance of clearance to the offending contour. In response to FCC attempts to streamline the application process, tabulations of distances to contours and Map M-3 Conductivities for each station have been omitted. These tabulations will be supplied upon request.

Exhibit 15.3 Extended View of WMKT.Pmc vs. WNAM.Cmc and Waiver Request

South Manitou Island is an uninhabited entity of the Sleeping Bear Dunes National Lakeshore shown to have no population in the U. S. 2000 Census. In addition, a waiver request was sought and granted allowing contour overlap for this exact same island in WNAM.C Construction Permit Application BP-20050725AEZ as well as the present WMKT operation. A similar waiver of the Rules is requested, (see Larson-Irwin Enterprises, 6 FCC 2d 613, 9 RR 2d 553 (1967)).
