

**Station KAZT-DT • Channel D25 • Prescott, Arizona  
- STA REQUEST -**

**Environmental Considerations**

An Environmental Assessment is not required, as grant of this application would not be considered a major environmental action. None of the conditions specified in Section 1.1307(a) of the FCC Rules, concerning actions that may have a significant effect on the environment, are believed to apply.

The proposed transmitting facilities can comply with the FCC guidelines limiting human exposure to radio frequency energy. Calculations using the formulas specified in FCC/OET Bulletin No. 65 (August 1997) indicate that the highest power density at ground level associated with the proposed operation would be 0.0067 mW/cm<sup>2</sup>, which is less than 5% of the 0.36 mW/cm<sup>2</sup> public limit applicable at TV Channel 25. The proposed facility is therefore categorically excluded by Commission Rules from having to consider the contributions of other stations at the site.
