

MINOR CHANGE APPLICATION
WFMS LICO, INC.
WFMS (FM) RADIO STATION
CH 238B - 95.5 MHZ - 13.0 KW
FISHERS, INDIANA
August 2007

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of WFMS Lico, Inc. ("WLI"), licensee of station WFMS, Channel 238A, Indianapolis, Indiana. In MB Docket #05-67 the city of license of WFMS was changed from Indianapolis, Indiana to Fishers, Indiana. WLI herein submits an application for construction permit to implement the change of city of license.

WLI is proposing to implement this change at the existing WFMS tower site, with the present WFMS facilities (no technical changes are proposed). As such, the Federal Aviation Administration was not apprised of this proposal. The tower has been registered with the Commission and assigned Antenna Structure Registration Number 1030144. At the proposed site, Channel 238B does not meet the Commission's minimum distance separation requirements to three other stations. These shortages are addressed in Exhibit A.

As WFMS shares a tower with two other FM stations, it was not possible to certify compliance with the Commission's RF exposure limits using the worksheets associated with FCC Form 301. Therefore, attached as Exhibit B is a study which shows this proposal complies

with the RF limits. All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to WLI and is available to the Commission upon request.¹

1) The undersigned has evaluated only the radio frequency radiation exposure portion of the environmental review. All other necessary reviews have been or will be addressed by the applicant. All data related to broadcast facilities was extracted from the CDBS database. We assume no liability for errors or omissions in that database which may be adverse to the request contained herein.
