

Request for Expedited Consideration

KXO, Inc., the licensee of Station KXO(AM), El Centro, California ("KI") hereby requests expedited consideration of this application to modify its facilities. As KI has previously informed the Commission, the tower on which KXO(AM) and KXO-FM were located fell down on October 16, 2004. KI promptly hired a consulting engineer and searched for a suitable site which took some time because of various California zoning and environmental restrictions. Once it secured a new site, KI began the process of obtaining clearance from the FAA and various state authorities. Unfortunately, these processes have lasted nearly two years and KI is eager to begin construction of the proposed new facility so that it can better serve its community.
