Re: Radio Antenna

Attn. Ben Michael

Dear Mr. Michael,

In accordance with your request our firm surveyed the installation of the directional radio antenna for WESU radio on the roof of the Science building on the campus of Wesleyan University. Our work was performed on May 27th, 2010. I certify that at the time of installation/adjustment of the antenna, an azimuth of 81 (eighty one) degrees was verified. The azimuth was based upon observation of Geodetic North.

We trust this is satisfactory. Thank You.

Sincerely,  
O'Brien Associates, Inc.

Philip J. O'Brien, Conn. L.S. #14,196
