

Chadwick Bay Broadcasting
FM Translator W235BP -- Facility ID 147989
September 2013 Application for Minor Change Construction Permit
Exhibit 12 -- Request for Waiver of 47 CFR § 74.1235(d)(3)

Concerning protection of Canadian FM facilities, please note that the proposed site is approximately 56 kilometers south of the US-Canada common border which bisects lake Erie; therefore, it is understood that this application will be referred to Canada for concurrence. As shown in exhibit 12B, the proposed 34dbu interference contour of W235BP clears all Canadian land by at least 2.8 kilometers. A request for waiver of 47 CFR 74.1235(d)(3) is respectfully requested.

The proposed W235BP 34dBu F(50,10) interfering contour extends north of the US-Canada border within Lake Erie, and exceeds the 60 km distance limit specified in 47 CFR § 74.1235(d)(3), but it clears all Canadian soil by at least 2.8 kilometers; therefore, the proposed operation would have no impact on any present or future Canadian FM broadcast facilities.

Applicant's Canadian engineering consultant has informed Industry Canada of this unusual situation and was told that no objection will be made if a formal notification is sent to Canada by the Commission. Applicant respectfully requests a waiver of the maximum 34 dBu distance limit of 47 CFR §74.1235(d)(3).
