

## EXHIBIT III – A 12a

### Page #1, Waiver Request of Section 74.1204

**K208DH, Bushland, TX 50 Watts ERP**

Calvary Chapel of Twin Falls, Inc. 6/02

The proposed site is contained entirely inside the service contour of second-adjacent stations KBZD, Amarillo, TX

#### **KBZD.LIC**

The proposed site is contained entirely inside the service contour of second-adjacent Station KBZD, Channel 259, Class C3, 21.5 kW, Amarillo, TX. As shown by the map on **page #2** of this waiver request, the level of the second-adjacent station KBZD arriving protected F(50,50) signal at the proposed transmitter site 84-dBu. Using the Undesired-to-Desired method for calculating proposed interference (the basis of the FCC current contour overlap regulations and an acceptable method for the purposes of determining lack of interference for an FM Translator), the proposed interfering contour with respect to KBZD is 124-dBu (free-space contour method employed). This means that the 124-dBu interfering signal would, in the worst case at the maximum radial, extend 32 meters from the center of radiation, which is proposed at 90 meters AGL. Since no population inhabits this interference area, Calvary Chapel of Twin Falls, Inc. respectfully requests a waiver of the FM translator contour overlap regulations with respect to second-adjacent channel station KBZD.
