K219KN (LIC), Barstow, CA Facility ID 121962  
Minor Modification of BLFT-20021015ACB

**EXHIBIT 17**

April 2013

**Environment Impact & RFR Compliance Statement**

FM translator K219KN is located at an established communications site that is in compliance with all environmental impact requirements.

K219KN currently operates with .027 kW ERP (non-da, H&V) at an antenna height above ground of 10 meters. This minor modification does not change any of the technical parameters other than a channel change and antenna make/model change.

For a worst case estimation at 2 meters above ground level at the base of the tower the RFR is no more than **14.1%** of the general population/uncontrolled MPE limit.

There are no other broadcast facilities at the site.

RFR hazard signs are posted at the site and the site has restricted access to only authorized personnel. The applicant certifies that in cooperation with other users of the site all authorized personnel will be protected from RFR exposure in excess of FCC guidelines while accessing any controlled exposure area, including the tower, by either reducing power or ceasing operations. Information pertaining to the contact representative of the facility will be posted.
