Re: Antenna Installation

To Whom It May Concern:

On December 22, 2011, Cherenzia & Associates, LTD. observed the positioning of the WXEV, Bradford, RI antenna installation, Kathrein, Inc. Scala division model CL-FM-VRM/50N.

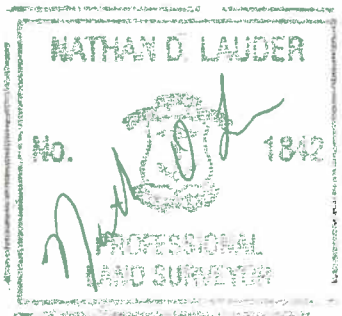

As prescribed in the installation directions of the test range proof of performance, the boom azimuths of the two antennae were calculated and verified.

As of the date of the fieldwork, the azimuth orientation of the first antenna boom was 0 degrees 0 minutes with respect to Geodetic North.

As of the date of the fieldwork, the azimuth orientation of the second antenna boom was 140 degrees 0 minutes with respect to Geodetic North.

The accuracy of this study is better than +/- 30 minutes (0.5 degrees).
