

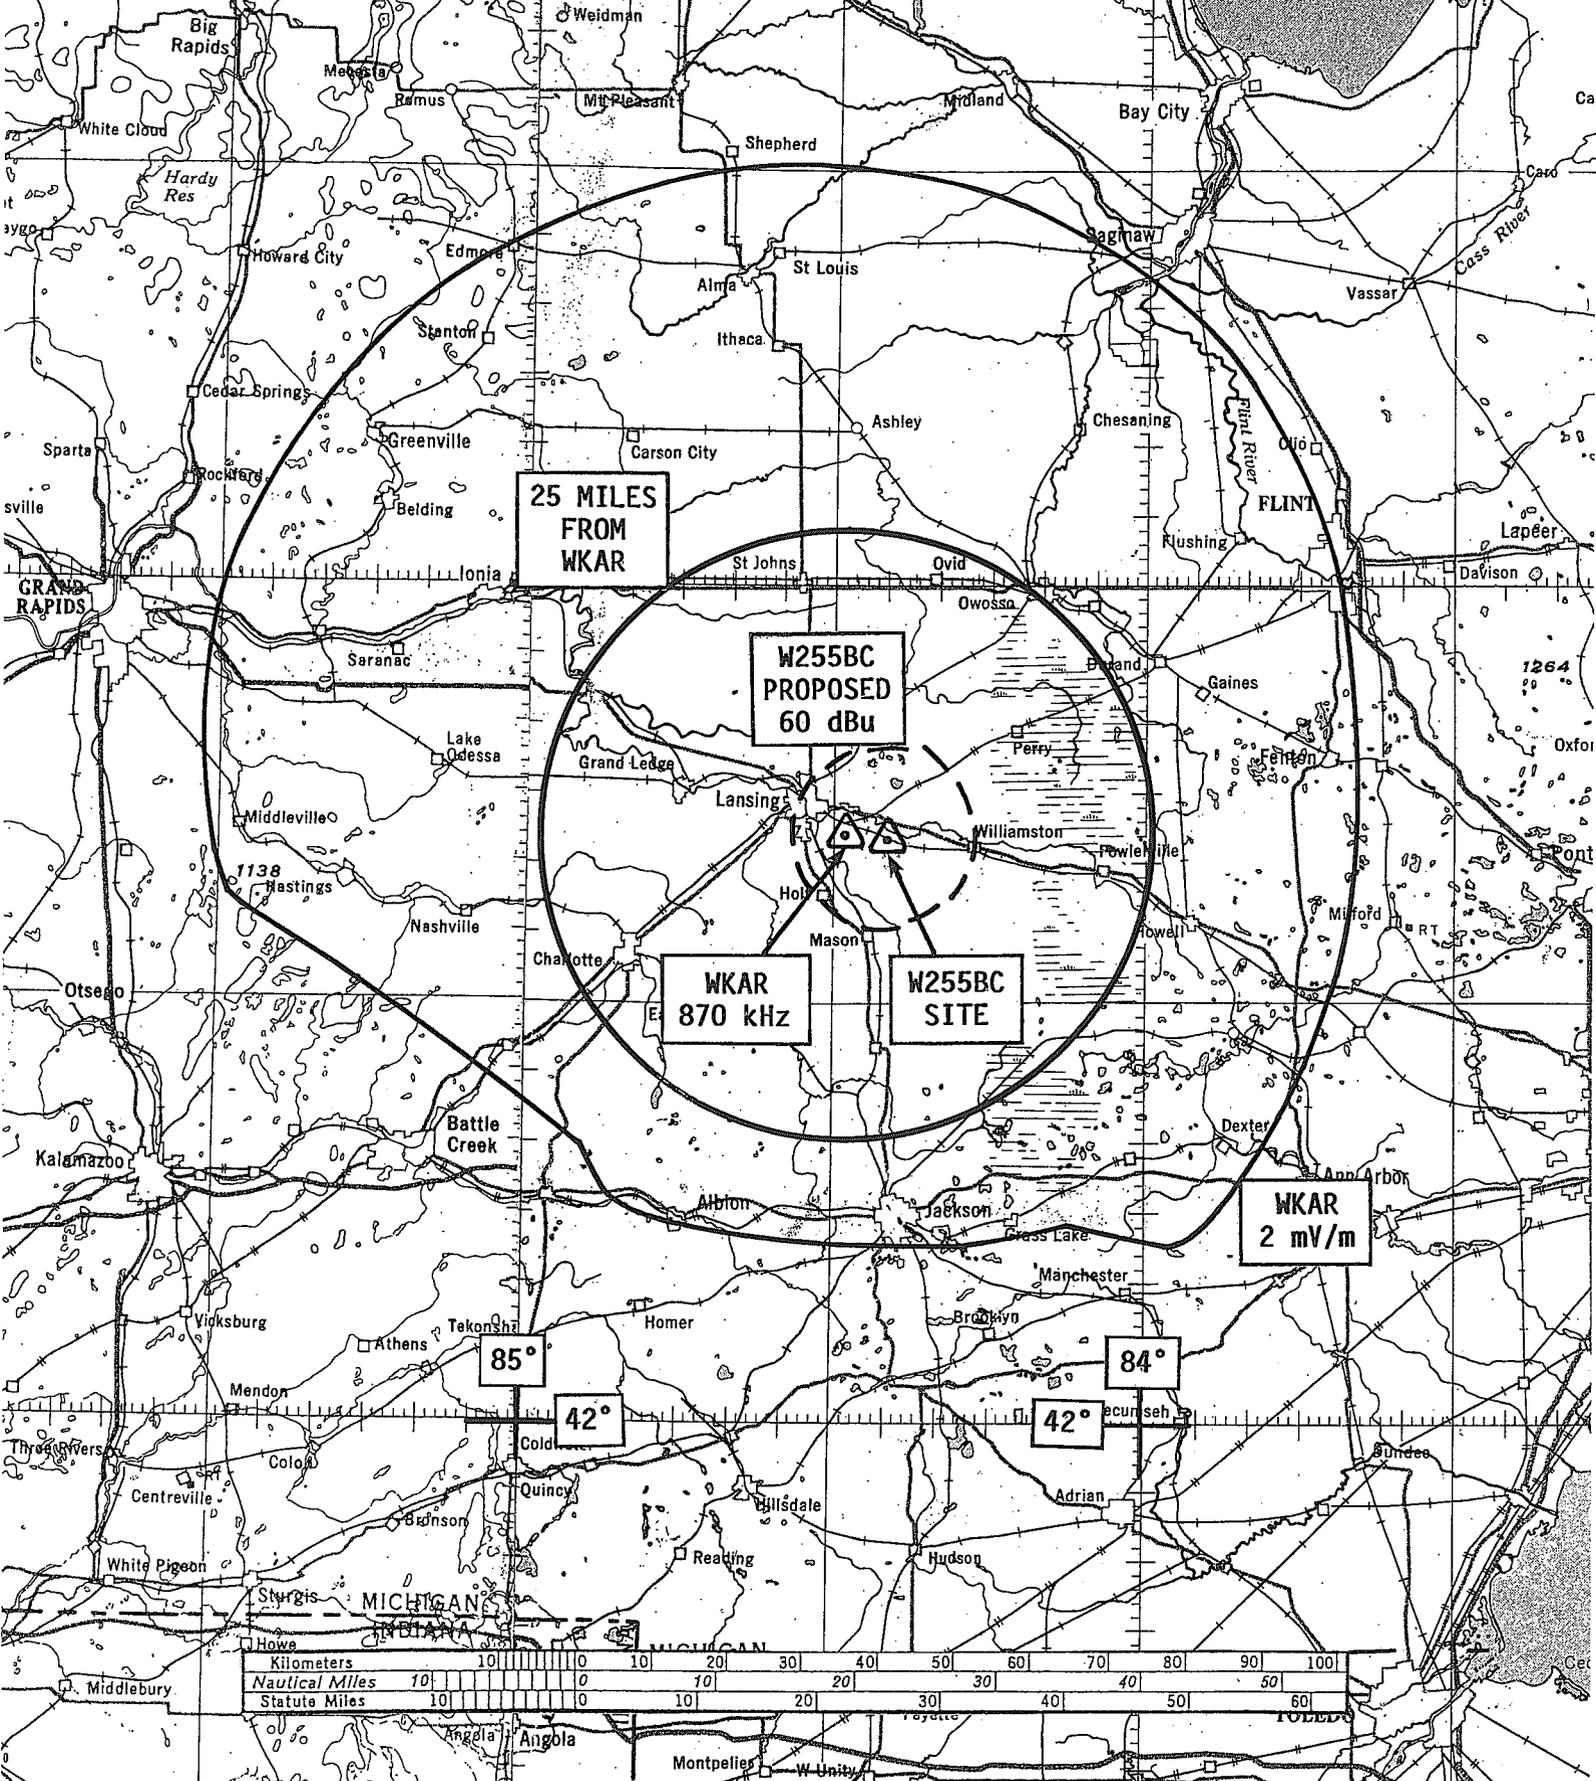

EXHIBIT 10  
(Page 1 of 2)

FILL IN TRANSLATOR REQUIREMENTS  
Board of Trustees, Michigan State University  
East Lansing, MI

Figure 10.0 is a map exhibit depicting the predicted 60 dBu contour for the proposed W255BC facilities in relation to the predicted 2 mV/m contour for facilities of WKAR(AM) - East Lansing, Michigan, the proposed primary station for this translator. As shown in this exhibit, the proposed 60 dBu contour will be totally contained within the predicted 2 mV/m daytime contour for WKAR and also will not extend beyond a distance of 25 miles from the WKAR transmitter site. As a result, these proposed facilities fully comply with the restrictions applicable to a fill in translator for an AM station.
