

## **Exhibit 13A**

### **Translator Caused Interference to 2<sup>nd</sup> & 3<sup>rd</sup> Adjacent Channels**

There is an overlap to K295AH, Goleta California, a 2<sup>nd</sup> Adjacent channel, and an overlap to KRAZ, Channel 290 Santa Ynez, California, a 3<sup>rd</sup> Adjacent channel. Both are dealt with utilizing the same methodology. The proposed translator has ZERO population within the 100dBu 50:10 interference contour of the translator. Therefore, there will be no interference caused. The population count was ascertained using ComStudy 2.0 and a 2010 population database.

Should it remain necessary, Lazer Broadcasting requests a waiver of 74.1204(d) to accommodate the alternate demonstration of non-interference.
