

*Derby Community Radio, Inc.* has been formed to pursue the possibility of creating a locally programmed community radio station and internet streaming to promote and educate the citizens of Derby and Mulvane Kansas.

It is the goal of *Derby Community Radio, Inc.* to educate the communities citizens on news and weather items that impact the surrounding areas as well as to inform citizens of upcoming events and happenings.

It is our desire to partner with the local high schools in an effort to support, encourage and help educate future students that may want to enter the field of broadcasting or mass communications.

In addition we plan to help promote and encourage local music talent in their efforts to get their music heard by working closely with area church and school music programs.

We also feel it is important to encourage and promote activities that effect the growing senior citizen population in our community and plan to work closely with the senior citizens center.

Derby is considered a "bedroom community" to our neighbor Wichita and we feel it is important to provide a fun and stress free on-air presence that a potential listener would feel "at home" when listening to after a hard days work. Derby is a growing community with a diverse population and although it is impossible to be "everything to everyone", it is our goal to have "something for everyone" at some point of the broadcast week.

*Derby Community Radio, Inc.* plans to provide a local "on-air resource" for promoting area business, school sports and music programs and all aspects that provide a positive quality of life in the community.
