

EXHIBIT 11

This narrative exhibit is submitted to demonstrate that this proposal fully complies with the interference criteria set forth in Section 74.1204 of the Commission's rules. Attached at exhibit 12 are a spacing study, an additional narrative exhibit which includes a Section 74.1204(d) showing, and maps demonstrating clearly that there is no prohibited overlap between this proposal and any other FM services. The attached FM spacing study demonstrates that this proposal would be fully spaced even as a full power Class A FM station to all but five other FM facilities. The attached maps and Section 74.1204(d) study with regard to overlap between this proposal and the coverage contour of WBHD, Olyphant, PA demonstrate that there is no prohibited contour overlap between these five facilities and the instant proposed FM translator facility. One currently licensed FM translator, two proposed new FM translators, and one full power FM facility have also been included on the maps because of their proximity to the proposed facilities. As demonstrated in these maps no prohibited overlap with these stations is predicted.

The nine facilities that have been included on the attached maps are: WDNH-FM, 95.3, Honesdale, PA (60 dBu contour to proposed 40 dBu interference contour); WBLJ-FM, 95.3, Shamokin, PA (60 dBu contour to prop. 40 dBu int. contour); WZZO, 95.1, Bethlehem, PA (54 dBu contour to proposed 48 dBu interference contour); WTTC-FM, 95.3, Towanda, PA (60 dBu contours to proposed 40 dBu interference contour); WBHD, 95.7, Olyphant, PA (60 dBu contour to proposed 100 dBu interference contour); W235AA, 94.9, Wilkes-Barre, PA (60 dBu contour to proposed 100 dBu interference contour); WBKT, 95.3, Norwich, NY (60 dBu contour to prop. 40 dBu int. contour); Proposed Translator, 94.7, Scranton, PA (60 dBu

contour to prop. 100 dBu int. contour; and Proposed Translator, 94.9, Moosic, PA (60 dBu contour to prop. 100 dBu int. contour).

W237BI Interference Analysis, Blown Up Scale is a map included to more clearly demonstrate that no proposed overlap exists between this proposal's 40 dBu interference contour and the 60 dBu coverage contour of WDNH-FM, 95.3, Honesdale, PA. W237BI 74.1204(d) Narrative and its related maps are included to show allowable overlap under Section 74.1204(d) with this proposal's 103.9 dBu interference contour and the 63.9 dBu coverage contour of WBHD, Olyphant, PA. A scale of kilometers has been included on the maps. These maps were drawn to scale using the rfSoftware series of computer programs.
