COMPREHENSIVE TECHNICAL EXHIBIT

Application for Construction Permit
K43LK, FCC ID 127216
FCC File Number BPTTL-20090217AFP
EICB-TV East, LLC

Application for Flashcut of Construction Permit. The within filing seeks to flashcut the facility to digital operation on its present channel. The proposal's F50,90 service contour encloses the protected F5,50 contour of the underlying facility; the same community is served.

Interference Analysis. An OET 69 Longley-Rice study exhibit for the above-captioned application was performed by the Techware, Inc. FCC interference analysis program on a Sun Blade computer. It revealed that the within application is in compliance with applicable portions of §74.793.

Dismissal of K43KJ-D. Policy requires that a either digital companion or its underlying parent station be permitted to digital operation, but not both. Accordingly, the applicant requests the dismissal of the construction permit BDCCDTLL-20061004AAG upon grant of the within application.
