Wisconsin Public Radio
Allen Rieland
821 University Av.
Madison, WI 53706

Mr. Rieland:

On August 12, 2002, I supervised the installation of the WVSS antenna and transmission line system near Knapp, WI. The antenna was installed by St. Paul Tower as per the Shively Labs installation drawing 90959 for the type 6810-1D-DA antenna. The antenna center of radiation is 293' AGL and the antenna heading is on a bearing of 0 degrees as per manufacturer.

My qualifications include Senior Radio/Television Broadcast Engineer certification from the Society of Broadcast Engineers, 22 years experience in broadcast engineering including a Bachelors of Science degree in Broadcast Engineering, and previous directional FM antenna experience (WHWC, 1998).

Sincerely,

A handwritten signature in cursive script that reads "Stephen M. Bauder".

Stephen M. Bauder
