<u>TECHNICAL STATEMENT</u>

This Technical Statement and attached exhibits were prepared on behalf of Starstation Radio, LLC. ("Starstation"), licensee of WLRR, Channel 264A, Milledgeville, Georgia. Starstation herein proposes modify WLRR's license to implement a change of community of license from Milledgeville, Georgia to Buckhead, Georgia using the one-step application procedure as outlined in MB Docket #05-210 (released November 29, 2006). This will become Buckhead's first commercial service.

In order to implement this change of community of license for WLRR, Starstation proposes to relocate the facility to a new site.[1] Exhibit A details the conditions that qualify WLRR as a minor change. From the proposed site, Channel 264A is mutually exclusive with WLRR's license and meets the Commission's minimum distance separation requirements. This proposal meets the Commission's technical rules for a city of license change.

Starstation proposes to implement this change at an existing tower site that has been registered with the FCC and assigned Antenna Structure Registration Number 1235965. Since this is an existing tower, the Federal Aviation Administration has not been apprised of this proposal.

1) The NED 3 second Terrain database is used throughout this application.

Buckhead is a community in a non-metro county. The WLRR proposed facility is not the only station in which Starstation has an attributable interest in Georgia. As such, a multiple ownership review is necessary. All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to Starstation and is available to the Commission upon request.[2]

2) The undersigned has reviewed only the RF exposure issues associated with this proposal. All data relating to broadcast facilities was extracted from the CDBS database on the date of this application. We assume no liability for errors or omissions in that database that are adverse to the requests made herein.
