

Technical Report
In Support of a
C.F.R. 47 Section 73.3555
Based
Interim Contour Method
Multiple Ownership Study

for

Saga Communications of New England, LLC

*WPVQ(FM) - Greenfield, MA
(Facility ID: 54780)
CH237A - 95.3 MHz*

October, 2017

Asher Broadcast Consulting, LLC
justinasher@consultant.com
1(202)875-2986

EXPLANATION OF REPORT: This Technical Report has been prepared to determine the number of commercial and non-commercial principal community contours associated with this proposed Form 301-FM Application for WPVQ(FM) - Greenfield, MA (Facility ID: 45780). As WPVQ(FM) is not listed within any BIA Market, this multiple ownership analysis has been prepared solely under the Interim Contour-Overlap Methodology.

Saga Communications of New England, LLC, presently holds a broadcast interest in nine (9) total aural services relevant to this WPVQ(FM) modification. Saga holdings not overlapping WPVQ(FM) need not be discussed herein. Concerning these nine (9) relevant holdings affecting this WPVQ(FM) modification, there will be two (2) unique and distinct markets which will result within this affected ownership group. "Market A" is comprised of five (5) station. "Market B" will also be comprised of five (5) stations. Each market is defined as follows:

"Market A"

CALL SIGN	CH/FREQ	CITY	STATE	FILE NUMBER
WPVQ(FM).P	237A	Greenfield	MA	Proposed Operation
WKNE(FM)	279B	Keene	NH	BMLH20070212AAW
WKVT-FM	224A	Brattleboro	VT	BMLH19900627KB
WRSY(FM)	268A	Marlboro	VT	BLH19960830KA
WKVT(AM)	1490	BRATTLEBORO	VT	BL-

"Market B"

CALL SIGN	CH/FREQ	CITY	STATE	FILE NUMBER
WPVQ(FM).P	237A	Greenfield	MA	Proposed Operation
WLZX-FM	257A	Northampton	MA	BLH20000112ABC
WHAI(FM)	252A	Greenfield	MA	BLH19910312KB
WRSI(FM)	230A	Turners Falls	MA	BLH19951018KB
WHMQ(AM)	1240	GREENFIELD	MA	BML20031112AJB

EXPLANATION OF METHODOLOGY: The facilities and results reported herein were taken from current copies of AM and FM computer databases as prepared by the FCC and supplied by V-Soft Communications, LLC. The facilities listed above serve as the basis for the respective principal community contours studied. The accuracy of the results of this study is understood to be limited to the accuracy of these databases. The FCC databases give no indication of licensed facilities that may be inoperative, construction permit facilities that may now be operating under program test authority (but have not yet been issued a license) or facilities which may have been licensed since the last update. Therefore, some stations may have been included or excluded erroneously. However, unless otherwise indicated, all licensed facilities known to be inoperative and all known applications and construction permit facilities, have been eliminated from consideration in this study.

For AM stations, Map M3 soil conductivity values and the authorized licensed transmitting facilities served as the basis for the computation of the predicted 5.0 mV/m groundwave contour in accordance with C.F.R. 47 Section 73.183 of the FCC Rules. The distance to the contour was computed for seventy-two (72) equally spaced azimuths beginning with 0° True. For FM stations, the authorized Center of Radiation and ERP values were utilized to compute the predicted 3.16 mV/m (70 dBμ) contour as provided in C.F.R. 47 Section 73.313 of the Rules. The predicted FM contours shown in this report are based on seventy-two (72) equally spaced terrain radials beginning with 0° True and assume NED 03 Second Terrain data.

As stated before, there will be two (2) unique and distinct markets associated with this proposal. The markets have been defined, in accordance with C.F.R. 47 Section 73.3555 of the FCC Rules, as the area within the total perimeter formed by the combined principal community contours of each relevant market as noted above.

EXPLANATION OF RESULTS: The nine (9) stations, under common control and relevant for this ownership group, have been noted in **Exhibit 1.0**. As stated before, no other Saga Communications of New England, LLC. holdings or any other holdings of parent company Saga Communications, Inc. are affected by this WPVQ(FM) modification. To aid in identifying the respective contours, currently controlled AM contours have been shown with solid light red lines. Currently controlled FM contours have been shown with solid light blue lines. Facilities to be modified or acquired have been shown in darker dashed lines. The “Market A” and “Market B” common overlap area has been designated as well.

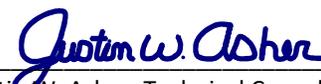

For “Market A”, the market defining contours have been shown in **Exhibit 2.0** of this report along with a minimum number of principal community contours entering the market. The defining contours have been shown with yellow lines on this map. AM contours entering the market have been denoted in red lines. FM contour entering the market have been shown in purple lines. As stated before, the contours shown represent enough stations to satisfy the minimum requirement of the Rules. Co-owned stations entering the market, but not defining the market have been omitted.

Under the current rules, the market falls within the minimum limitations set forth in §73.3555 (a)(1)(iii): *In a radio market with between 15 and 29 (inclusive) full-power, commercial and noncommercial radio stations, not more than 6 commercial radio stations in total and not more than 4 commercial stations in the same service (AM or FM).* The principal community contours of at least twenty (20) other stations entering the market are shown in **Exhibit 2.0**. Including the four (4) FM station(s) and one (1) AM station which define the market, there are at least twenty-five (25) aural services in this market. **Exhibit 2.1** lists the facilities of the individual stations used in this report.

For “Market B”, the market defining contours have been shown in **Exhibit 3.0** of this report along with a minimum number of principal community contours entering the market. The defining contours have been shown with green lines on this map. AM contours entering the market have been denoted in red lines. FM contour entering the market have been shown in purple lines. As stated before, the contours shown represent enough stations to satisfy the minimum requirement of the Rules. Co-owned stations entering the market, but not defining the market have been omitted.

Under the current rules, the market falls within the minimum limitations set forth in §73.3555 (a)(1)(iii): *In a radio market with between 15 and 29 (inclusive) full-power, commercial and noncommercial radio stations, not more than 6 commercial radio stations in total and not more than 4 commercial stations in the same service (AM or FM).* The principal community contours of at least twenty (20) other stations entering the market are shown in **Exhibit 3.0**. Including the four (4) FM station(s) and one (1) AM station which define the market, there are at least twenty-five (25) aural services in this market. **Exhibit 3.1** lists the facilities of the individual stations used in this report.

CERTIFICATION OF TECHNICAL CONSULTANT: *I declare, under penalty of perjury, that the contents of this report are true and accurate to the best of my knowledge and belief. I further certify I have over eighteen years of experience as a broadcast technical consultant before the Federal Communications Commission (“the FCC”); and am familiar with the Code of Federal Regulations Title 47 (“the Rules”) as pertaining to this report and its contents herein. The underlying data utilized in this report was taken directly from FCC databases or indirectly through third party software vendors securing data directly from FCC databases. This firm cannot be held liable for errors or omissions resulting from the underlying data. The information contained herein is believed accurate to the date reported below.*
