## COMPREHENSIVE TECHNICAL EXHIBIT

**Application for Flash Cut of Construction Permit**  
**K09YK, FCC ID 127303**  
**FCC File Number BMPTVL-20090721ACD**  
**EICB-TV East, LLC**

**Application for Flash Cut to digital operation.** The within filing seeks to change the above-entitled permit from analog to digital operation. The proposal's 51 dBu F50,90 contour entirely encompasses that of the underlying construction permit; the same community is served.

**Use of Unregistered Tower.** The application is on a 46 meter tower used by several communication entities. The proposal was subjected to *Towair* analysis and found not to require registration with the FCC, thanks to being more than 8 meters from any airport.

**Interference Analysis.** An OET 69 Longley-Rice study exhibit for the above-captioned application was performed by the Techware, Inc. FCC interference analysis program on a Sun Blade computer. The study yielded the information that the application is in compliance with all applicable portions of §74.793.
