

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. (“CCBL”). CCBL proposes to modify WKSJ-FM. A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Call Sign	City of License	Facilities
WKSJ-FM(PROPOSED)	Mobile, FL	Channel 235C, 100 kW, 468 m
WRKH(FM)	Mobile, AL	Channel 241C, 97 kW, 409 m
WTKE(FM)	Holt, FL	Channel 251C1, 89 kW, 314 m
WMXC(FM)	Mobile, FL	Channel 260C, 100 kW, 535 m
WTKX-FM	Pensacola, FL	Channel 268C, 100 kW, 405 m
WDWG(FM)	Moss Point, MS	Channel 285C2, 33 kW, 183 m
WNTM(AM)	Mobile, AL	710 kHz, 1 kW, U, DAN
WKSJ(AM)	Prichard, AL	1270 kHz, 5 kW, U, ND1

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission multiple ownership rules.¹

There are no other principal community coverage contours controlled or proposed to be controlled by CCBL that overlap or intersect the proposed modifications to WKSJ-FM(PROPOSED).

Radio Markets

The “radio market” applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the commonly owned stations. The predicted principal contours of WKSJ-FM(PROPOSED), WRKH(FM), WTKE(FM), WMXC(FM), WTKX-FM, WDWG(FM), WNXP(FM), WNTM(AM) and WKSJ(AM) are shown in Figure 1 herein. There are two “radio markets” for analysis under the Commission’s Rules.

Market 1 is defined by the principal community contours of WKSJ-FM(PROPOSED), WRKH(FM), WMXC(FM), WTKX-FM, WDWG(FM), WNTM(AM) and WKSJ(AM).

Market 2 is defined by the principal community contours of WKSJ-FM(PROPOSED), WTKE(FM), WMXC(FM), WTKX-FM.

¹ See Section 73.3555 of the FCC Rules.

Count of Stations in Defined Markets

The number of radio stations in each “radio market” is determined by counting the operating, commercial stations having principal community contours which overlap or intersect the principal community contours which define the radio market, plus the subject co-owned stations.

In Markets 1 and 2, there are at least 51 radio stations (24 AM and 27 FM), including the subject co-owned stations, that intersect or overlap each of the “radio markets.”

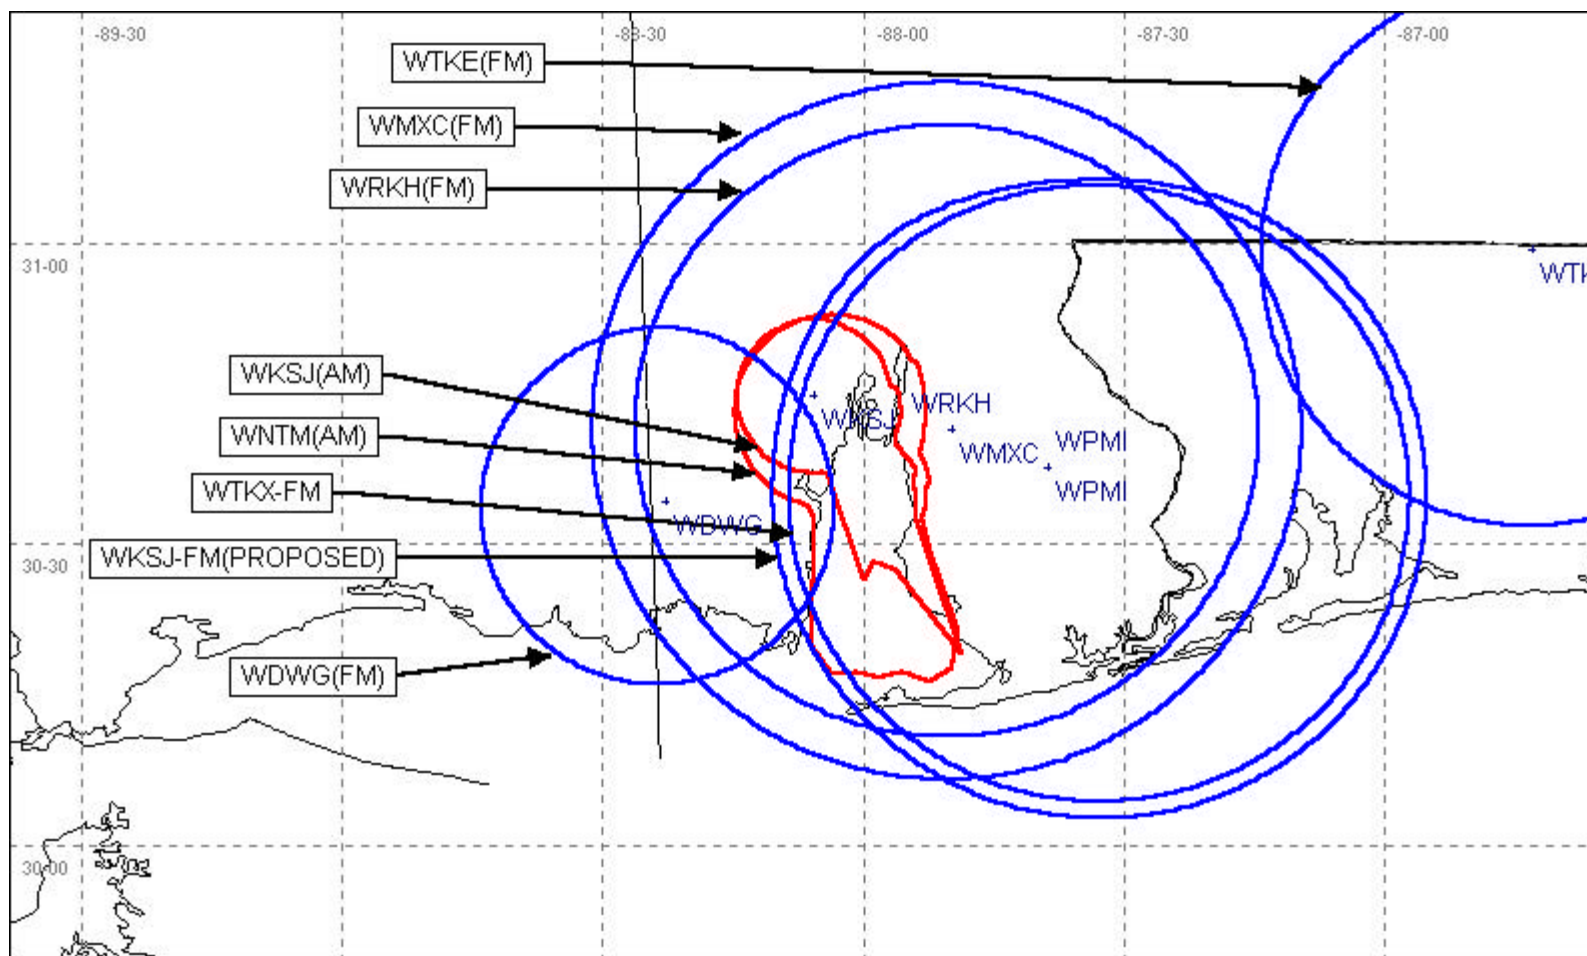

Figure 2 is the tabulation of the other radio stations identified in each of the defined radio market. Only known licensed, operation commercial stations were employed for the study. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission’s AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 CFR 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 CFR 73.313. Terrain data was derived from the N.G.D.C. 30-second computer database for each of the FM stations using radials spaced ever 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with Section 73.3555(a) of the FCC Rules.

A handwritten signature in black ink, appearing to read "R M Gates Jr", written in a cursive style.
