

Univision Communications Inc.
FCC Form 315
Exhibit 19

After a subsidiary of Univision Communications Inc. was declared the winning high bidder in the FCC's auction for a Channel 52 television construction permit in Blanco, Texas, an unsuccessful bidder in the auction challenged a waiver requested in the application. In his reply to UTGI's opposition, the unsuccessful applicant argued that statements relating to the waiver "cross the line of advocacy into the realm of material misrepresentations," and requested that all of UTGI's licenses be set for hearing. The application remains pending.
