

APPLICATION FOR STATION LICENSE
RINGLING CENTER, LLC
W295BH FM TRANSLATOR STATION
CH 295D - 106.9 MHZ - 0.055 KW
SARASOTA, FLORIDA
November 2009

TECHNICAL STATEMENT

This Technical Statement was prepared on behalf of Ringling Center, LLC ("RC"), licensee of FM translator station W295BH, Channel 278D, Sarasota, Florida. RC has a construction permit (BPFT-20090204ACR) to make minor changes to the W295BH facilities. RC herein submits a license application to cover the outstanding permit. Attached as Exhibit A is a calculation of the transmitter power output for FM translator W295BH.

There are three special operating conditions/restrictions listed on the W295BH permit. The first condition states that RC will reduce the power of W295BH, or cease operation, to insure persons with access to the site are not exposed to radio frequency radiation levels in excess of the FCC's guidelines. RC states that it will, in cooperation with other tower users, reduce the power of W295BH or cease operation, as necessary, to insure that persons having access to the tower will not be exposed to radio frequency electromagnetic fields in excess of the FCC's guidelines

The second condition states that an application for license, FCC Form 350, must be on file prior to commencing program tests with the facilities authorized in the permit. The submission of this instant application satisfies the condition.

The third condition states, "If the antenna is mounted on an existing tower that is not base insulated or detuned at the AM frequency (WSRQ, 1220 kHz), the permittee shall submit a certification to this effect." We, therefore, certify that the antenna is mounted on a tower that is not base insulated, nor is it detuned at the AM frequency of WSRQ.

Based on the foregoing, it is believed all conditions on the W295BH construction permit have been satisfied.
