

ENGINEERING STATEMENT

The engineering data contained herein have been prepared on behalf of FOX TELEVISION STATIONS, INC., licensee of WTXF-DT, Channel 42 in Philadelphia, Pennsylvania, in support of this application for modification of Construction Permit BPCDT-20080313ACO. The purpose of this application is to report a reduction in overall height of the WTXF-DT antenna supporting structure. The present top-mounted WTXF-TV analog antenna is being replaced with the digital antenna authorized in BPCDT-20080313ACO. Since the new antenna is significantly shorter than that being replaced, the overall height of the structure (including appurtenances) is being reduced by 18 meters.

No change in transmitter site location, antenna make/model, effective antenna height, or effective radiated power is proposed herein. As a result, there are no changes in contour distances, interference to other co-channel and adjacent-channel stations, or power density calculations. Accordingly, the FAA has been notified of the change in overall height and has approved the reduction in Aeronautical Study No. 2009-AEA-1466-OE. In addition, the FCC's Antenna Structure Registration database record for this tower has been updated to reflect the new height value.

I declare under penalty of perjury that the foregoing statements are true and correct to the best of my knowledge and belief.

KEVIN T. FISHER
