

EXHIBIT 17
ENVIRONMENTAL COMPLIANCE
NEW CORTLAND, OHIO 260D
KINGSTRUST LLC
FCC FORM 349
MAY 2018

The facility proposes to utilize a Scala CL-FM directional antenna with an Effective Radiated Power of 1 Watt. The proposed Center of Radiation will be 4.5 meters Above Ground Level at a building site.

Calculations were made using FM Model for Windows, version 2.10. FM Model predicts a peak exposure of 6.414 W/cm^2 at a distance of 0.8 meters from the base of the tower. This represents less than 3.21% of the allowable Maximum Permissible Exposure (MPE) of 200 W/cm^2 for uncontrolled environments at any point on the ground. The applicant will ensure that the public access to the tower is restricted by fencing, anti-climb devices or other appropriate measures. If climbing of the tower by authorized personnel becomes necessary, transmitter power will be reduced to safe operating levels or transmission will be terminated, if necessary, as not to exceed the RF exposure limits to tower workers. The licensee will cooperate with other users at the site with the scheduling of such tower or antenna maintenance.
