

**WCPB Channel 28
Salisbury, MD
Supplemental RF Exposure Statement
June 20, 2008**

The facility proposed in this application is for post DTV transition operation and will replace both the current digital and analog facilities. The current the current digital operation on channel 56 has an ERP of 130 kW while the current analog operates with 2,190 kW on channel 28. The new DTV facility will operate on the current analog channel 28 utilizing with an ERP of 132 kW. An RF exposure study indicates that the levels on the ground in the vicinity of the tower will be below the acceptable limits. In addition, with the termination of the analog facility the overall RF radiation at the site will be reduced. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
