BPCT-781221LL	CONTINUED	<p>CONDITIONS: Prior to construction of the TV tower authorized herein, permittee shall notify AM Stations WGST, WYZE and WQXI (Daytime) so that those stations may determine operating power by the indirect method. Permittee shall be responsible for the installation and continued maintenance of detuning apparatus necessary to prevent adverse affects upon the radiation patterns of the afore-mentioned AM Stations. Subsequent to construction of the TV tower and installation of all appurtenances thereon, antenna impedance measurements of the AM antennas shall be made and sufficient field strength measurements obtained on at least 10 locations along each of eight equally spaced radials shall be made to establish that the AM radiation patterns are essentially omnidirectional, and, BEFORE TV PROGRAM TESTS ARE AUTHORIZED the results submitted to the Commission in applications for the AM stations to return to the direct method of power determination.</p> <p>Additional condition on back of card.</p>		
BMPCT-810127KE		<p>MP (BPCT-781221LL) to chg. ERP to Vis. 32.26kW(H), 1684kW(H); Aux. 168.4kW(H)(Max); chg. TL to 210 Peachtree St., Atlanta, Ga. (33-45-34 84-23-19); chg. SL to 161 Linden Ave., Atlanta; HAAT: 980 feet.</p>	SP	2-4-81

Prior to construction of the TV tower authorized herein, permittee shall notify AM Stations W P L O, W K L S, W R N G and W Q X I (Nighttime) so that, if necessary, the AM Stations may determine operating power by the indirect method and request temporary authority from the Commission in Washington to operate with parameters at variance in order to maintain monitoring point field strengths within authorized limits. Permittee shall be responsible for the installation and continued maintenance of detuning apparatus necessary to prevent adverse affects upon the radiation patterns of the aforementioned AM Stations. Both prior to construction of the TV tower and subsequent to the installation of all appurtenances thereon, a partial proof of performance, as defined by Section 73.154(a) of the Commission's Rules, shall be conducted to establish that the AM arrays have not been adversely affected and, BEFORE TV PROGRAM TESTS COMMENCE, the results submitted to the Commission and to the AM Station

About the History Cards ...

History Cards were first used by the Department of Commerce to keep track of applications filed by, and changes to, the earliest AM broadcast radio stations in the early 1920s. The records were subsequently transferred to the Federal Radio Commission in 1927, and after that to the Federal Communications Commission when that agency was created in 1934. These cards gradually grew into a large card file.

TV History Cards were initiated in the early 1940s, with the authorization of the earliest TV stations. History Cards remained in use until the creation of the first computerized database in 1980 to track broadcast applications, the Broadcast Application Processing System (BAPS). However, the Commission did not transfer the data from the History Cards to the new system. Instead, it retained the History Cards in their original form for reference.

In 1999, the Commission moved to a new location (445 12th Street SW), and also at that time created the successor database to BAPS, the Consolidated DataBase System (CDBS). Prior to that move, the History Cards were transferred to microfiche by a contractor (only a few sets of microfiche exist), and the original paper cards were destroyed. The History Cards were stored on the microfiche as negative images, like those you see above.

History Cards contain very brief entries and notes about station facilities, applications, and ownership. They are not, and never were intended to be, a comprehensive record of a station's operations. Nevertheless, they can be useful to help determine, for example, when a station first went on the air and its call letters at that time. History Card comments were generally typed onto the cards, and thus some records will show more faintly or with more smudging than others, depending on the quality of typewriter and ribbon then used. Occasional handwritten comments, corrections, and strikeouts may also be found. Cards may be incomplete, missing, or occasionally out of sequence.

The History Cards are presented here as they were copied to microfiche, to preserve this record for public use, and with the hope that they will be of value to future researchers of television station history.
