

TECHNICAL STATEMENT
RADIO MULTIPLE OWNERSHIP ANALYSIS
CLEAR CHANNEL BROADCASTING LICENSES, INC.

This statement and the attached figures were prepared on behalf of Clear Channel Broadcasting Licenses, Inc. ("CCBL"), a licensee subsidiary of Clear Channel Communications, Inc. CCBL proposes to modify the facilities of WFLF(AM). A multiple ownership analysis was prepared considering the following radio stations under present or proposed common ownership or time brokerage:

Table 1: Proposed Commonly Owned or Controlled Stations Studied

Call Sign	City	State	Freq	Status
WFLF(AM)	Pine Hills	FL	540 kHz	APP
WQTM(AM)	Orlando	FL	740 kHz	LIC
WFLA(AM)	Tampa	FL	970 kHz	LIC
WTIR(AM)	Winter Garden	FL	1680 kHz	LIC
WFLZ-FM	Tampa	FL	93.3 MHz	LIC
WXTB(FM)	Clearwater	FL	97.9 MHz	LIC
WLRQ-FM	Cocoa	FL	99.3 MHz	LIC
WSHE(FM)	Orlando	FL	100.3 MHz	LIC ¹
WMTX(FM)	Tampa	FL	100.7 MHz	LIC
WJRR(FM)	Cocoa Beach	FL	101.1 MHz	LIC
WTBT(FM)	Bradenton	FL	103.5 MHz	LIC
WTKS-FM	Cocoa Beach	FL	104.1 MHz	LIC
WXXL(FM)	Tavares	FL	106.7 MHz	LIC ²
WMGF(FM)	Mount Dora	FL	107.7 MHz	LIC

Since certain of these stations have overlapping principal community contours (5 mV/m for AM stations, 3.16 mV/m for FM stations), an ownership study has been prepared in accordance with the Federal Communications Commission's multiple ownership rules³.

¹ The change in the facilities of WSHE(FM) proposed in Permit No. BPH-20010410ADA, which extends the station's service contour, is not addressed in this study, as its sole potential effect would be to increase the number of total stations in the relevant radio market.

² The change in the facilities of WXXL(FM) proposed in Permit No. BPH-19980626IB, which extends the station's service contour, is not addressed in this study, as its sole potential effect would be to increase the number of total stations in the relevant radio market.

³ See 47 C.F.R. § 73.3555.

There are no other principal community coverage contours controlled (or proposed to be controlled) by CCBL that overlap or intersect the proposed facility of WFLF(AM).

Radio Markets

The "radio market" applicable to common ownership of the subject stations is defined as the area encompassed by the mutually overlapping principal community contours of the proposed commonly owned stations. These mutually overlapping contours form three "radio markets" for analysis under the Commission's rules.

Radio Market "1" is defined by the mutually overlapping principal community contours of WFLF(AM) (as proposed in the accompanying Form 301 application), WFLA(AM), WFLZ-FM, WMTX(FM), WTBT(FM), and WXTB(FM). The predicted principal community contours of these stations (2 AM, 3 FM) are shown in *Figure 1*.

Radio Market "2" is defined by the mutually overlapping principal community contours of WFLF(AM) (as proposed in the accompanying Form 301 application), WFLZ-FM, WMTX(FM), WTBT(FM), and WXXL(FM). The predicted principal community contours of these stations (1 AM, 4 FM) are shown in *Figure 3*.

Radio Market "3" is defined by the mutually overlapping principal community contours of WFLF(AM) (as proposed in the accompanying Form 301 application), WWQT(AM), WTIR(AM), WJRR(FM), WSHE(FM), WTKS-FM, and WXXL(FM). The predicted principal community contours of these stations (3 AM, 4 FM) are shown in *Figure 5*.

Radio Market "4" is defined by the mutually overlapping principal community contours of WFLF(AM) (as proposed in the accompanying Form 301 application), WQTM(AM), WXXL(FM), WMGF(FM), WJRR(FM), WTKS-FM, and WSHE(FM). The predicted principal community contours of these stations (2 AM, 5 FM) are shown in *Figure 7*.

Radio Market "5" is defined by the mutually overlapping principal community contours of WFLF(AM) (as proposed in the accompanying Form 301 application), WLRQ-FM, WJRR(FM), WTKS-FM, and WSHE(FM). The predicted principal community contours of these stations (1 AM, 4 FM) are shown in *Figure 9*.

Count of Stations in Defined Markets

The number of radio stations in a "radio market" is determined by counting the operating, commercial stations having principal community contours that

overlap or intersect the principal community contours that define the radio market, plus the subject commonly owned or controlled stations.

In Radio Market "1" studied herein, there are at least 10 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Figure 2* is the tabulation of the radio stations identified in the market.

In Radio Market "2" studied herein, there are at least 15 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Figure 4* is the tabulation of the radio stations identified in the market.

In Radio Market "3" studied herein, there are at least 30 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Figure 6* is the tabulation of the radio stations identified in the market.

In Radio Market "4" studied herein, there are at least 45 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Figure 8* is the tabulation of the radio stations identified in the market.

In Radio Market "5" studied herein, there are at least 15 radio stations, including the subject co-owned stations, that overlap or intersect with the defined "radio market." *Figure 10* is the tabulation of the radio stations identified in the market.

Only known licensed, operating commercial stations were included in this tabulation. Distances to contours for AM stations were predicted using the antenna patterns as identified in the Commission's AM database and the appropriate Ground Wave Field Strength versus Distance Graph of 47 C.F.R. § 73.184. Ground conductivities were obtained from FCC Figure M3. Distances to the FM contours were determined based on the method of 47 C.F.R. § 73.313. Terrain data was derived from the N.G.D.C. 30 second computer database for each of the FM stations using radials spaced every 10 degrees of azimuth.

Based on the above, it is concluded that the proposed modifications comply with § 73.3555(a) of the FCC Rules.

Sincerely,

Nestor Custodio
FCC Processing Administrator
Clear Channel Broadcasting Licenses, Inc.
