Don Beuttner  
WLAB Radio  
6600 North Clinton  
Fort Wayne, IN 46825

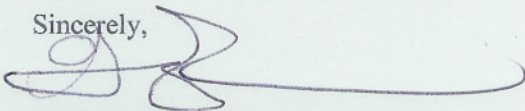

Dear Mr. Buettner:

As you are aware, Broadcast Technical Engineering provided project management oversight for the planning and installation of a new antenna and transmission/feed line for WLAB radio.

As part of this project, an engineer from BTE was present and supervised the tower crew during the installation of the new antenna and feed line. Throughout this process, BTE engineers observed that the Janpro antenna was assembled and installed in accordance with the instructions provided by the manufacturer. This letter is to certify that to the best of our knowledge all procedures and instructions were followed in order to ensure proper functionality of the antenna and feed line.

If you have any questions, or need any additional information, please feel free to contact me.

Sincerely,

Gregory J. Case  
Owner/Chief Engineer  
Broadcast Technical Engineering.
