West Frankfort, Illinois 62896

March 8, 2005

In evaluating the proposed relocation and change of coverage for K34DW FID 67023, an outgoing interference study was executed at the existing tower location, and an ERP of 4 kW. The stations listed in the table below showed possible interference. When these stations were evaluated for outgoing interference using the OET-69 Longley Rice methodology. There was zero percent interference present found in each case when rounded to the nearest whole percent.
