

WEST VIRGINIA RADIO CORPORATION
OF CLARKSBURG
WFBY-FM

AFFIDAVIT

This is to certify that the Dielectric SKM6CD.5 6-bay directional antenna with matching Central Tower Lambda section was installed atop the modified Bell Atlantic, self-supporting tower for WFBY-FM. The superstructure of the aforementioned tower was strengthened with galvanized, high-tinsel, steel and certified structurally sound by Clay Carter, Professional Engineer with Greer Industries. The antenna and Lambda section was installed by Tri-Star Communications of Clarksburg, West Virginia. The orientation was performed and verified by Larry King, licensed surveyor for the state of West Virginia.

All of the above tower, antenna, and transmitter installation was performed under my supervision and done so in accordance with all manufacturers and consultants instructions and specifications to the best of my knowledge.

Noel W. Richardson SBE/CSRE
