

MINOR CHANGE APPLICATION
PROVIDENT BROADCASTING COMPANY, INC.
WVFJ-FM RADIO STATION
CH 227C0 - 93.3 MHZ - 100.0 KW
MANCHESTER, GEORGIA
October 2005

TECHNICAL STATEMENT

This Technical Statement and attached exhibits were prepared on behalf of Provident Broadcasting Company, Inc. ("PBC"), licensee of WVFJ-FM, Channel 227C1, Manchester, Georgia. PBC proposes to relocate the facility, increase the height above ground, above mean sea level and above average terrain, the effective radiated power of WVFJ-FM, and upgrade the station to Channel 227C0, pursuant to the Commission's one-step application process. The ability to upgrade to Class C0 is based on a recent relocation of station WZGC, Channel 225C1, Atlanta, Georgia. WZGC is now operating with the facilities specified in BPH-20050321APU, and a license to cover the permit is pending before the Commission. As such, the licensed WZGC, BLH-19801021AB is not considered.

PBC is proposing to locate the antenna system for WVFJ-FM on a new tower. As such, the Federal Aviation Administration was appraised of this proposal. Once the tower has received a Determination of No Hazard, the structure will be registered with the Commission. At the site proposed for the implementation of the WVFJ-FM upgrade, Channel 227C0 does not meet the Commissions minimum distance separation requirements to one other facility. As such, processing pursuant to §73.215 is requested, see Exhibit A.

A fully compliant reference site, at which the allotment of Channel 227C0 is proposed, the channel meets the separation requirements, will provide a 70 dBu signal over all of Manchester, Georgia, and is not located off-shore or on airport property and is, therefore, suitable for tower construction.¹ All other necessary documentation used to certify the technical portion of FCC Form 301 has been forwarded to the applicant and is available to the Commission upon request.

1) The proposed allocation site also does not protect the former licensed site for WZGC (BLH-19801021AB), but rather the operating site as authorized in BPH-20050321APU (for which a license application has been filed).
