ENGINEERING REPORT

Iglesia Jesucristo Es Mi Refugio, Inc.

K43AG: Site-Move to Victorville, TX and Flash-cut to 43D

EXHIBIT 11

LPTV FLASH-CUT TO DIGITAL – INTERFERENCE STUDIES

1. Iglesia Jesucristo Es Mi Refugio, Inc. ("Applicant") is the licensee of K43AG, Ridgecrest, CA, analog channel 43. By this application, Applicant is proposing a new transmitter site for K43AG with digital service on channel 43. The community of license is also being changed to Victorville, CA. The site move is less than 30 miles. This flash-cut proposal is a minor change application.

2. Because this is a digital proposal, it is believed that this application will require Mexican Coordination.

3. Figure 1, attached, demonstrates contour overlap between the licensed channel 43 analog facility's 74 dBu F50,50 service contour and the proposed channel 43 digital facility's 51 dBu F50,90 service contour.

4. Attached as Figure 2 (for the current TV environment) and Figure 3 (for the post-transition environment) are the OET-69 study results for the proposed facility (as the referenced station) as determined on a Sun Computer using a Solaris (Unix-based) operating system and using the same OET-69 software as developed for use by the FCC. (According to the software developer, the program used herein provides identical results as the FCC's OET-69 processing program.) As demonstrated by Figures 2 and 3, the proposed facility adequately protects all required US broadcast stations as required by the FCC Rules. All studies are conducted in accordance with current FCC Rules and Regulations.

5. The Applicant accepts any existing and future interference that may result from any primary or secondary TV station that is otherwise deemed to have status priority to the herein-proposed facility.
