

ENGINEERING STATEMENT

In support of a

Digital Displacement Application for Construction Permit

To move to Digital Channel 29

KFXL-LD Lufkin, TX

15 kW ERP 307.8 m RCAMSL

PURPOSE

MARSAND, INC. has been retained by Warwick Communications, Inc. (the "Licensee") Licensee of KFXL-LP analog Channel 30 of Lufkin, TX (the "Station"), to prepare this engineering statement in support of this Digital Displacement Application for Construction Permit (CP) to move to digital service on Channel 29.

DISCUSSION

The Licensee proposes to use a new, directional, side mount antenna. The Licensee also proposes to install a type accepted, digital transmitter and add a new simple mask, RF filter for digital service. The proposed facility is located at the existing analog site. An interference study was run using the minimum power required to replicate the analog coverage on digital Ch 30. The minimum interference criteria could not be met, therefore a suitable channel was found on Ch 29 that did meet the necessary criteria (see discussion below).

An interference study using the TV Process (digital low power version) by Meintel, Sgrignoli & Wallace (a software program which is familiar to the Commission that is written in Fortran and run on a Sun Microsystems workstation and employs the methods outlined in the OET 69 Bulletin), confirms that the proposed facility would not exceed 0.5% new interference to any other full power or class A stations and would not exceed 2.0% new interference to other low power stations (using the existing, post transition database). The study results are listed in the Appendix. A summary of the interference study is included below in **Table 1**.

Stations Potentially Affected by Proposal

Channel	Call Letters	City/State	Distance (km)	Status	Application Reference Number	Interference

Table 1

The calculated F(50,90) 51 dBu service grade contour would encompass the principal community, Tyler, TX, entirely as shown in **Figure 1**.

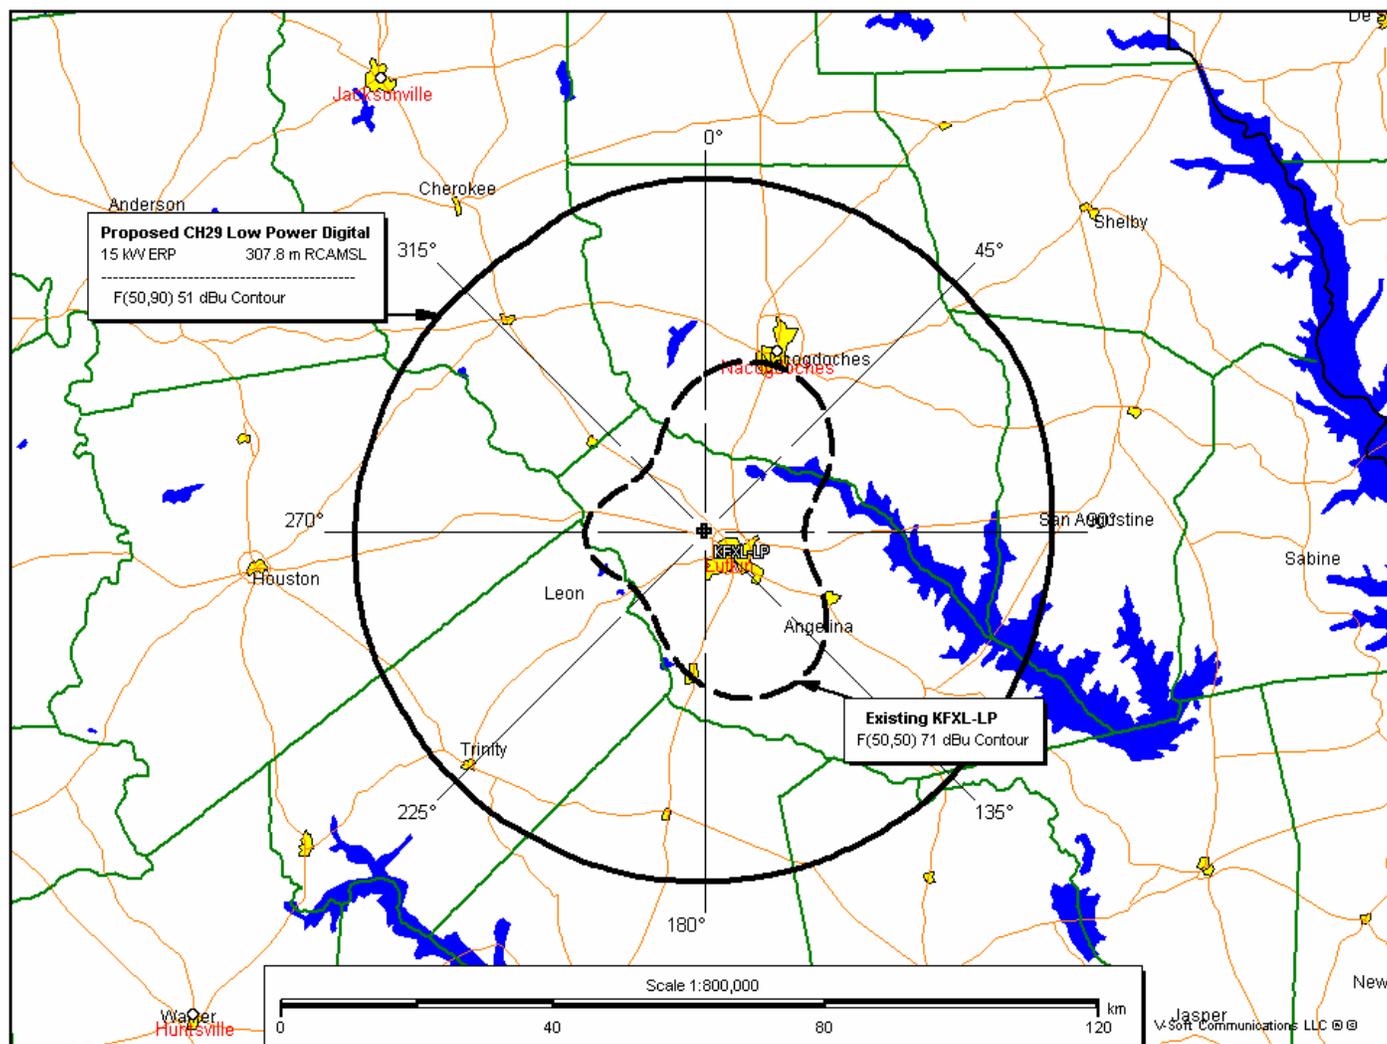

Figure 1

The proposal is clear of any FCC monitoring stations, quiet zones, border zones and Table Mountain. It is also further than 3.2 km from the nearest AM station.

RF Radiation Exposure Statement

The requirements of Section 73.1307(b) of the FCC Rules regarding human exposure to radio frequency (RF) energy are met under this instant application for the post-transition digital television facility proposed herein.

The proposed facility utilizes the an existing, multi-use tower structure (ASR 1047148). The site is restricted access. The station agrees to maintain full compliance with the safety precautions to workers on the tower (controlled) and the general public (uncontrolled) by reducing or removing radiated power during the time of construction or maintenance on or near the antenna. The station also certifies that it, in coordination with other users of the site, will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from Radiofrequency Electromagnetic exposure in excess of FCC guidelines.

Table 2 shows the calculations of RF level 2m above ground level for the General Public / Uncontrolled (GP/U) would not exceed 5% of the Maximum Permissible Exposure (MPE) limit. The calculations are shown in the Appendix. The proposed facility is therefore a negligible contributor to the RF environment at all ground level locations and is excluded from the routine environmental evaluation pursuant to Section 1.1307(b) of the FCC Rules.

Call Letters	Channel / Frequency	Distance from RCAGL to 2 m AGL	Worst Case Downward Radiation (Relative Field)	Calculated Power Density (uW/cm ²)	GP/U MPE (uW/cm ²)	Percentage of GP/U MPE
KFXL-LD	CH29 560-566	196.1	0.20	0.52	400	0.14%

Table 2

CONCLUSION

It is respectfully requested that the Commission grant this request for CP for the proposed transmission facility as indicated in the Tech Box of the accompanying Application Form 346.

DECLARATION

Matthew A. Sanderford, Jr., P.E., declares and states that he is a graduate Electrical Engineer with a Bachelor of Science Degree in Electrical Engineering from the University of Texas at El Paso, a Licensed Professional Engineer in the State of Texas, and his qualifications are known to the Federal Communications Commission, and that he is President of MARSAND, INC., a Registered Professional Engineering firm in the State of Texas, and that firm has been retained by the Licensee, to perform the engineering support as contained in this report.

All facts contained herein are true of his own knowledge except where stated to be on information or belief provided by the Licensee, and as to those facts, he believes them to be true.

I declare under penalty of perjury that the foregoing is true and correct.

Matthew A. Sanderford, Jr., P.E.

President - MARSAND, INC.

Executed this 29th day of June, 2009

OET Bulletin No. 56

DTV Average Power **15,000 W ERP**

Typical relative field factor in the downward direction: **0.20**
 (conservative estimate)

Antenna Radiation Center Above Ground Level (RCAGL): **198.1 m**

Occupational/Controlled (O/C) Exposure

Highest Calculated Power Density: **0.51 $\mu\text{W}/\text{cm}^2$**

Maximum Permissible Exposure (MPE) for this Channel -

Frequency (middle of the band): **563 MHz**

MPE O/C Limit (6 minutes average): **1.9 mW/cm^2**

Percentage of MPE O/C Limit: **0.03 %**

General Population/Uncontrolled (GP/U) Exposure

Typical height of a person's head standing at ground level: **2 m**

Distance from head height to antenna radiation center: **196.1 m**

Highest Calculated Power Density: **0.52 $\mu\text{W}/\text{cm}^2$**

Maximum Permissible Exposure (MPE) for this Channel -

Frequency (middle of the band): **563 MHz**

MPE GP/U Limit (30 minutes average): **0.4 mW/cm^2**

Percentage of MPE GP/U Limit: **0.14 %**

DTV EFFECTIVE RADIATED POWER CALCULATIONS

Call letters: **KFXL-LD** Date: **6/29/2009**
 Location: **Lufkin, TX**
 Channel: **29A**
 Frequency: **563 MHz Mid-Band**
 Antenna: **ERI ALP32M3-HSO-29**

Transmitter Power Output (TPO):	1.070 kW avg.	0.29 dBk
Filter Type:	Loss:	dB
Transmission Line:	1-5/8" Heliax	
Loss per 100 ft.:	-0.509 dB	
Line Length:	700 ft.	
Total Line Loss:	-3.563 dB	-3.56 dB

Antenna Input Power:	0.47 kW	-3.27 dBk
----------------------	----------------	------------------

Efficiency: **44.025 %**

NOTE: In addition to the information called for in this section, an explanatory exhibit providing full particulars must be submitted for each question for which a "No" response is provided.												
12.	Out-of-channel Emission Mask: <input checked="" type="radio"/> Simple <input type="radio"/> Stringent											
CERTIFICATION												

13.	Interference : The proposed facility complies with all of the following applicable rule sections. 47.C.F.R Sections 74.709, 74.793(e), 74.793(f), 74.793(g), 74.793(h), 74.794(b) and 73.1030.	<input checked="" type="radio"/> Yes <input type="radio"/> No
See Explanation in Exhibit 11		
14.	Environmental Protection Act . The proposed facility is excluded from environmental processing under 47. C.F.R. Section 1.1306 (i.e., The facility will not have a significant environmental impact and complies with the maximum permissible radiofrequency electromagnetic exposure limits for controlled and uncontrolled environments). Unless the applicant can determine RF compliance, an Exhibit is required .	<input checked="" type="radio"/> Yes <input type="radio"/> No
By checking "Yes" above, the applicant also certifies that it, in coordination with other users of the site, will reduce power or cease operation as necessary to protect persons having access to the site, tower or antenna from radiofrequency electromagnetic exposure in excess of FCC guidelines.		See Explanation in Exhibit 12
15.	Channels 52-59 . If the proposed channel is within channels 52-59, the applicant certifies compliance with the following requirements, as applicable:	
<input type="checkbox"/> The applicant is applying for a digital companion channel for which no suitable channel from channel 2-51 is available.		
<input type="checkbox"/> Pursuant to Section 74.786(d), the applicant has notified, within 30 days of filing this application, all commercial wireless licenses of the spectrum comprising the proposed TV channel and the first adjacent channels thereto, for which the proposed digital LPTV or TV translator antenna site lies inside the licensed geographic boundaries of the wireless licensees or within 75 miles and 50 miles, respectively, of the geographic boundaries of co-channel and adjacent-channel wireless licensees.		
16.	Channels 60-69 . If the proposed channel is within channels 60-69, the applicant certifies compliance with the following requirements, as applicable:	
<input type="checkbox"/> Pursuant to Section 74.786(e), the applicant has notified, within 30 days of filing this application , all commercial wireless licenses of the spectrum comprising the proposed TV channel and the first adjacent channels thereto, for which the proposed digital LPTV or TV translator antenna site lies inside the licensed geographic boundaries of the wireless licensees or within 75 miles and 50 miles, respectively, of the geographic boundaries of co-channel and adjacent-channel wireless licensees.		
<input type="checkbox"/> Pursuant to Section 74.786(e), the applicant proposing operation on channel 63, 64, 68 and 69 ("public safety channels") has secured a coordinated spectrum use agreements(s) with 700 MHz public safety regional planning committee(s) and state administrator(s) of the region(s) and state(s) within which the antenna site of the digital LPTV or TV translator station is proposed to locate, and those adjoining regions and states with boundaries within 75 miles of the proposed station location.		
<input type="checkbox"/> Pursuant to Section 74.786(e), the applicant for a channel adjacent to channel 63, 64, 68 or 69 has notified, within 30 days of filing this application, the 700 MHz public safety regional planning committee(s) and state administrator(s) of the region and state containing the proposed digital LPTV or TV translator antenna site and regions and states whose geographic boundaries lie within 50 miles of the proposed LPTV or TV translator antenna site.		
PREPARERS CERTIFICATION ON PAGE 3 MUST BE COMPLETED AND SIGNED.
