Subject: WAUG-LP - STA application - BSTA 20121206AED - Specified power

Mr. Habib (FCC)

Mohammad,

In further response to your inquiry today - please consider this email an additional amendment to the requested STA.

Based upon our telephone conversation - you have indicated that a specified ERP must be provided (not a maximum not to exceed value).

The proposed STA should be amended to specify an ERP of 15 watts (0.015 kW). We understand that if the station is capable of increasing its Effective Radiated Power (ERP) at a later date an additional STA will be required. The "out of channel emission mask" for the proposed STA for WAUG-LP (digital channel 8) is "Simple"

Please associate this email amendment with the STA request. BSTA 20121206AED

Thank you,

Timothy Z. Sawyer, Consulting Engineer
