**TECHNICAL STATEMENT**

This Technical Statement and attached exhibits were prepared on behalf of Cumulus Licensing LLC ("Cumulus"), licensee of FM radio station KMJK, Channel 297C, Lexington, Missouri. Cumulus requests permission to construct a new auxiliary FM antenna system for KMJK for use when the main system is out of service for repairs or maintenance. The proposed auxiliary system will operate with an effective radiated power of 37.0 kilowatts.

Cumulus is proposing a new tower to support the auxiliary antenna. The Federal Aviation Administration has been apprised of this proposal and has issued a Determination of No Hazard. The tower has been assigned Antenna Structure Registration Number 1249313. Since this is a proposed auxiliary antenna system, no allocation review, community coverage issues, main studio location or interference issues are considered in this instant application. Attached, as Exhibit A, is a map which shows the proposed auxiliary facility's 60 dBu contour will not extend beyond that of the licensed KMJK 60 dBu contour. All other data used to certify the information contained in the application has been forwarded to Cumulus and is available for submission to the Commission upon request.
