Exhibit 12 Page 3
Edgewater Broadcasting Inc.
Interference Area to WJLQ and WTKX-FM
Bay Minette, Alabama

The Proposed translator is within the 60 dBu contour of lower second adjacent station WJLQ, channel 264, and upper second adjacent station WTKX-FM, channel 268. The WJLQ contour at the translator site is 87.2 dBu F(50,50) and the WTKX-FM contour at the translator site is 81 dBu F(50,50). Using the ratio of 100:1 (translator to WJLQ and WTKX-FM) on the second adjacent channel, the population within the proposed translator 127.2 dBu and 121 dBu contour is zero. Using the free space equation, the predicted interference area is expected to extend 13 meters, for WJLQ, and 27 meters for WTKX-FM from the antenna. The antenna is 52 meters above ground level thus the interference area will never reach the ground. Therefore, the application is in compliance with the following: §74.1204 (d) "The provisions of this section concerning prohibited overlap will not apply where the area of such overlap lies entirely over water. In addition, an application otherwise precluded by this section will be accepted if it can be demonstrated that no actual interference will occur due to intervening terrain, lack of population or such other factors as may be applicable."

The map displays the Mobile Bay area with latitude and longitude coordinates. A grid is overlaid on the map. Various place names are labeled, including Citronelle, Bay Minette, and many others. Radio signal coverage is shown with concentric circles and lines. Labels for signal strength include WJLQ 60 dBu, WTKX-FM 60 dBu, 60 dBu, 54 dBu, 40 dBu, and WTKX-FM. The map also shows the Gulf of Mexico to the south and the Alabama coast to the east.
