

## **EXHIBIT 12**

**Waiver Request of Section 74.1204**  
Conway, SC W203BG 70 Watts ERP  
Calvary Chapel of Twin Falls, Inc. 2/06

The proposed site is contained entirely inside the service contour of second-adjacent station WKVC North Myrtle Beach, SC.

### **WKVC**

The proposed site is contained entirely inside the service contour of second-adjacent station WKVC, Channel 205, Class C1, 100kW, North Myrtle Beach, SC. The level of least arriving protected F(50,50) signal at the proposed transmitter site is 65.4-dBu. Using the Undesired-to-Desired method for calculating proposed interference, the interfering contour with respect to WKVC is 105.4-dBu (free-space contour method employed). The interfering signal would, in the worst case at the maximum radial, extend 321 meters, or .321km, from the base of the tower. This tower is located in a very sparsely populated rural area to the East of Conway, SC. Attached is a section of the Topo Map Nixonville, SC which shows that this interfering contour does not cover any population. Because there are no residences, businesses or roads that are located within the interfering contour, Calvary Chapel of Twin Falls, Inc. respectfully requests a waiver of the FM translator contour overlap regulations with respect to second-adjacent channel station WKVC.
