

TECHNICAL STATEMENT
IN SUPPORT OF
MODIFICATION OF LICENSE
KZII-FM, LUBBOCK, TEXAS
CHANNEL 273C1
FACILITY I.D. 61150

This instant application is being filed on behalf of Townsquare Media Lubbock License, LLC Licensee of the above referenced FM Broadcast Station, the purpose of which is to request a minor correction to the stations licensed coordinates¹.

The antenna registration lists the following NAD '83 coordinates based on a land survey conducted on May 27, 2008 by Hugo Reed and Associates, Inc. of Lubbock, TX.

North Latitude 33° 31' 04.4" West Longitude 101° 51' 24.8"

The licensed coordinates reflect an error of 1.0° latitude and 1.8° longitude in NAD '83 datum. Converting the surveyed coordinates to North American **NAD '27** datum we have the following:

North Latitude 33° 31' 04.1" West Longitude 101° 51' 23.2"

The licensee therefore requests the above coordinates be listed on the stations License to agree with the assigned ASRN 1050308 and FAA determination 2008-ASW-4993-OE.

This minor variation in coordinates results in less than one foot change in AMSL as shown on USGS Quadrangle map titled "Lubbock East".

The total distance from the licensed and requested coordinates is approximately 211 feet and therefore has negligible effect on the current spacing situation.
